

4Ddoors

**MOTORS
FOR HOME
& INDUSTRY.**

MORE THAN DOORS

4Ddoors brings the very best products from Germany and Europe, to you. Our beautifully finished products are coupled with the most technologically advanced systems available.

From the large and frequently used commercial door to integrated residential doors, gates and automation, 4Ddoors provides complete access solutions. Whether it's for Home or Industry, 4Ddoors has the best solutions in garage door and gate access technology.

Collaboratively, we bring the best of the world to you.

GARAGE DOORS MORE THAN MOTORS

MADE IN GERMANY

The German Range of 4Ddoors and Opener products are developed and built exclusively in Germany. The exacting standards of German design and manufacturing ensure high quality, reliability and safety.

ADAPTIVE POWER FLOW TECHNOLOGY/ APFT

Adaptive Power Flow Technology (APFT) enables 4Ddoors Openers to regulate the power required for efficient operation of the garage door. Changes in door behaviour may be caused by several factors, including softening of springs and fluctuating temperatures. APFT regulates and self adjusts which ensures safe, functional and reliable operation.

UNIQUE 5 YEAR WARRANTY*

The 5-year Warranty covers the drive mechanics, the motor and even the motor controller for five years or up to 200,000 door cycles (1 cycle = open and close).

SENSITIVE OBSTACLE DETECTION SYSTEM

With an integrated and intelligent automatic shutdown function, 4Ddoors Openers are able to detect obstructions in the garage door path. The Opener will stop the door and open it until the obstruction is cleared, reducing the risk of accidental damage or injury.

CERTIFIED SAFETY

German 4Ddoors Openers adhere to the highest DIN EN 13241-1 certification. Only after rigorous testing do they qualify to bear the TÜV and standard quality seal.

VENTILATION FUNCTION

The freely programmable opening height is especially practical for garages that have no other ventilation options such as windows or side doors. It guarantees a better room climate and prevents the accumulation of moisture in the garage.

INCREASED SMART SECURITY FUNCTION

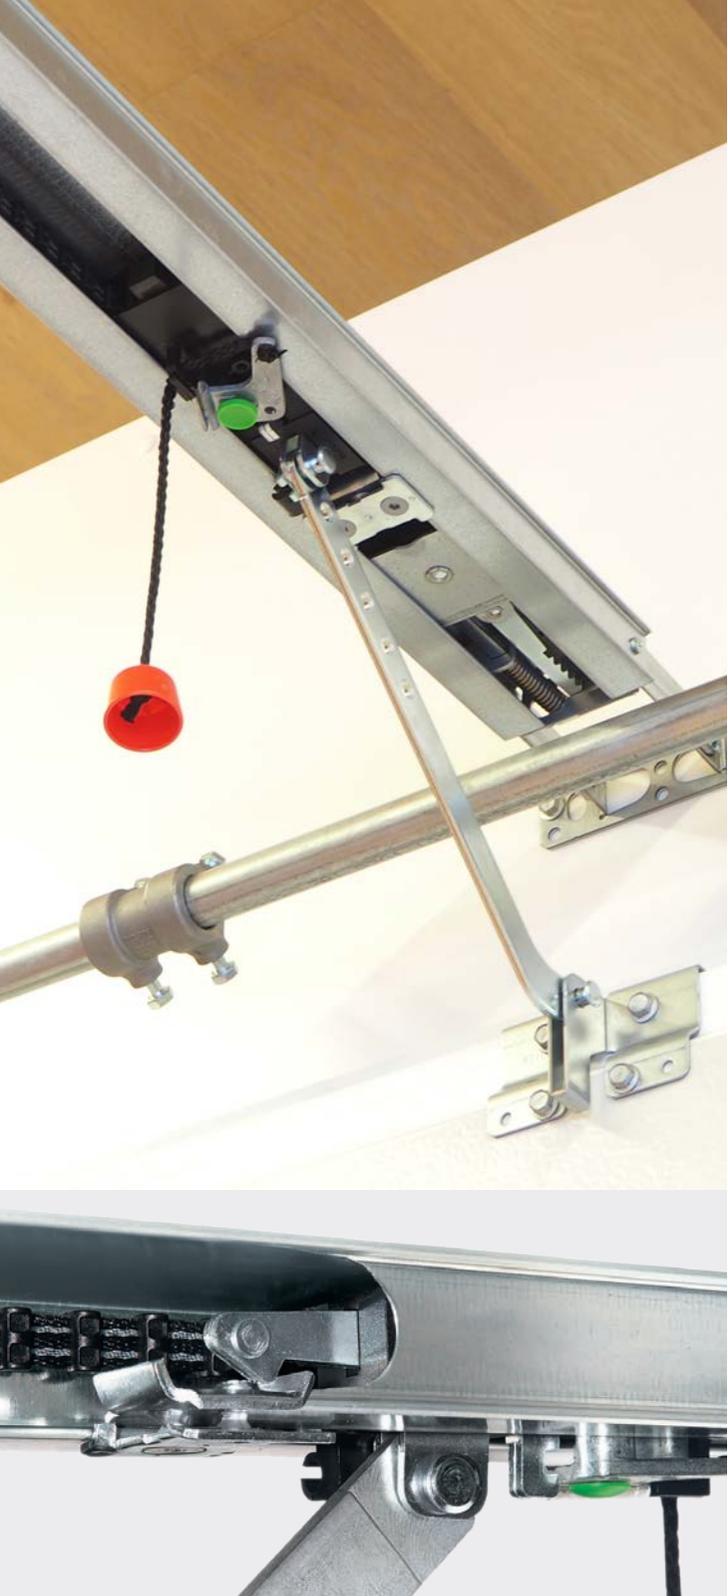

When the door reaches the closed position, the mechanical lock and guide rail work in tandem to provide a positive locking system. Developed exclusively for the German 4Ddoors range, the Opener provides unparalleled security and becomes an essential part of your home protection.

SOFT START AND SOFT STOP

The integrated soft start and soft stop function provides a quiet and gentle operation of the door. This ramping of the door travel speed ensures quiet, smooth and durable operation.

MORE THAN CLEVER

INTEGRATED BREAK IN PROTECTION - UNIQUE LOCKING RAIL

MECHANICAL LOCKING SYSTEM

Upon completion of the closing cycle, the door is immediately engaged by the integrated locking mechanism. This high level of security is achieved without the need for an external power supply, maintaining security even in the event of a power outage.

FLEXIBLE RAIL SYSTEM - NO NOISE

Loud chain noises are a thing of the past with the Flexible Flat Rail system. Choose from a toothed belt fabricated from either a polyester/polymide or heavy-duty polyurethane with steel braid.

FULLY MAINTENANCE FREE

Both the polyester/polymide or heavy duty polyurethane belts are completely maintenance free.

EMERGENCY RELEASE

In the event of a power failure, the Emergency Release Function ensures the garage door can be opened manually from the inside at all times. Simply pull the cord next to the green button.

THE RIGHT MATERIAL

The refined geometry and 3cm slim profile of the rail, reduces twisting and guarantees the durability and safe operation of your door system.

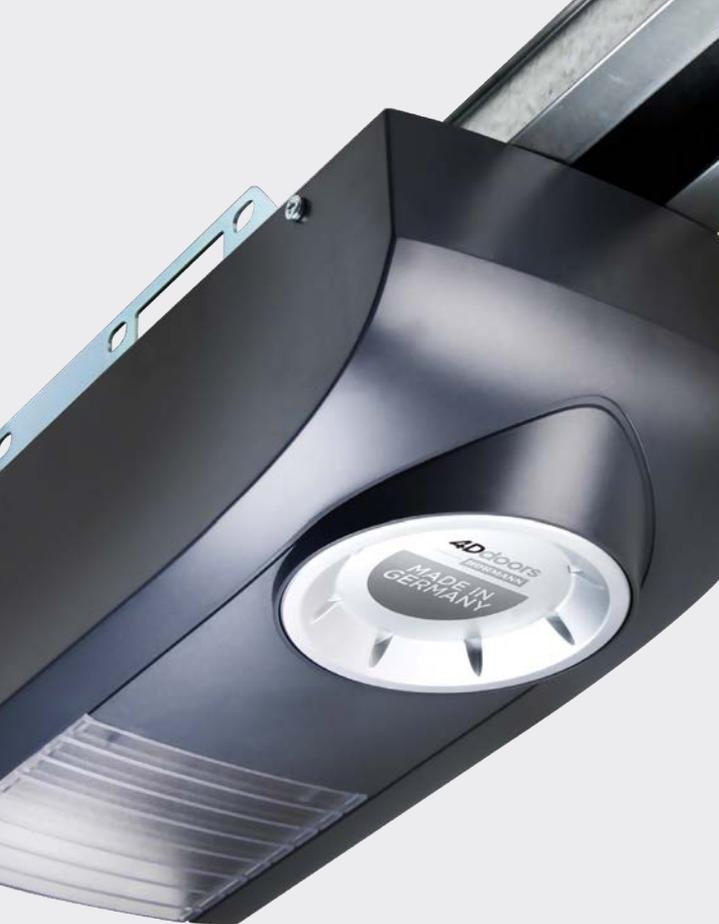

FAST AND SIMPLE ASSEMBLY

Quick and easy to install, 4Ddoors Openers operate on one single suspension point regardless of the length the rail.

GARAGE DOORS

GA103

The GA103 Garage Door operator is complete with the latest technical innovations. The 4Ddoors Operator has a second opening height as a standard programmable feature, with an opening power of 600 N. Owners can expect the highest level of security and user safety, along with a 5 Year Warranty. All units are TUV tested and exceed or surpass the most stringent industry requirements for reliability and performance.

* Optional Accessories

GARAGE DOORS

GA203 | GA403 | GA403-TG | GA501

For the first time in Australia all the innovative functions and advantages of 4Ddoors are combined in one Garage Door Opener Range. LED Lighting, energy saving stand-by function, faster opening speed, the highest level of home security and personal safety. All with the inclusion of a 5 Year Warranty (or 200,000 cycles - whichever occurs first, conditions apply).

MORE POWER

The new Openers from 4Ddoors operate even the largest garage doors. Up to 1200 N guarantees extra power when it's needed and ensures safe, smooth and quiet operation.

MORE LIGHT

Premium LED systems provide up to 1000 hours of light. Long lasting and environmentally friendly, LED lighting is substantially brighter while using significantly less energy.

MORE SPEED

Up to 50% faster than standard garage door openers, the programmable Quick Opening function will complete the opening cycle in seconds.

SIMPLE MENU NAVIGATION

A fully programmable extended memory and newly designed menu system can be accessed at the press of a button.

The menu cannot be accessed externally which safeguards against accidental reprogramming and unauthorised access.

LESS ENERGY CONSUMPTION

The new generation of Openers by 4Ddoors are energy efficient. The 0.5W power consumption in standby mode ensures a considerable reduction in power usage, lowering running costs and improving environmental impact.
